

Protect Sensitive Digital Equipment with 3-in-1 Anti-static Tarps from THOR

Your sensitive fiber optical switch cost up to \$90,000,000 to install. Are you doing everything you can to protect that switch?

Maybe not, if you haven't implemented THOR's new anti-static protection plan. Our unique anti-static, fire retardant DuraShield™ 8000 ASFR tarps can increase your protection three ways.

1 Water Protection

Prepare NOW for an upcoming disaster. We have attached a center drain, rope, hose and shut off valve to our anti-static tarp so "The Three-in-One Tarp" will protect your switch if the roof leaks. Simply take the tarp which was being used as a dust partition and suspend it over the digital equipment, saving the day, the fiber optic switch and your customer's satisfaction.

The Rain Drain™ tarp protection kit is like a fire extinguisher on the wall. You hope you will never have to use it, but when you have a leak, you need protection now!

Kits come in various sizes, and include a heavy duty hemmed and grommetted tarp, an attached shut off valve, 15' of 3/4" garden hose and 100' of 400# test polypropylene rope.

2 Static-free Mat

Use the tarp as a safe, static-free mat on which to place circuit boards or tools while working on static sensitive equipment.

3 Dust Partition

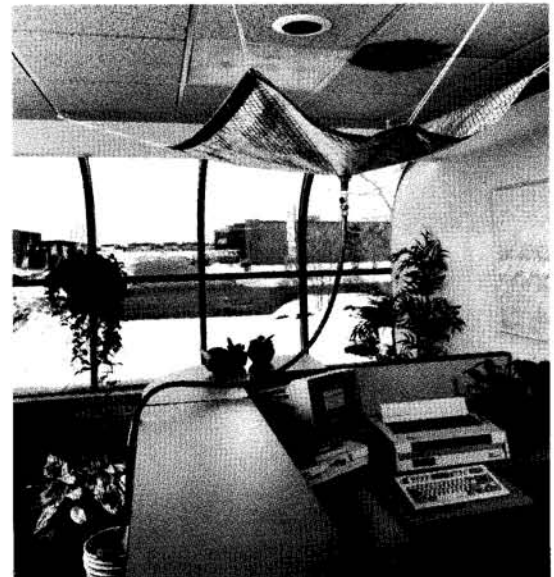

Light construction and carpentry projects raise a lot of dust which can severely damage sensitive equipment. Hang the tarp by its grommets to contain the static charged dust.

DuraShield 8000 ASFR

- ✓ Virgin polyethylene
- ✓ Rugged woven reinforced construction
- ✓ Strong yet lightweight
- ✓ Available in rolls or custom sizes

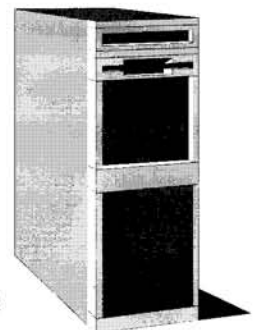

THOR

THOR DuraShield 8000ASFR Tarps in the Typical Central Office Switching Facility

- Dramatically decrease electrostatic discharge in many different areas of the central office
- Save \$1000s in ruined components and lost revenue due to switch downtime
- Take a major step beyond ordinary protection by guarding against both dust and electronic contamination
- White tarp maximizes existing light conditions
- Yellow implies CAUTION and affords privacy of stored tools, equipment
- Green blends in with outdoor earth colors

Protecting Lives, Revenues and Resources

THOR Tarps for the Central Office Environment

Specifications

- ❑ **Standard Weight** 5.6 oz/yd² or 40#/msf
- ❑ **Thickness** 12.0 mils
- ❑ **Tensile Strength** 185#/inch width
- ❑ **Impact Strength** 325 psi mullen burst
- ❑ **Abrasion Resistance** > 10,000 flex cycles

Features

- ❑ Rot and mildew proof, 100% synthetic
- ❑ ANI & NFPA approved as fire retardant
- ❑ Rugged, woven reinforced polyethylene
- ❑ Anti-static, with impregnated conductive grid
- ❑ Available in natural, yellow and green
- ❑ Available in rolls or custom sizes, with loops, hems, grommets or Velcro closures

Conductive

Anti-static

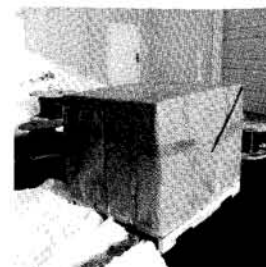

- ❑ **Surface Resistivity** 10¹² ohms psi
- ❑ **Static Decay** < 2 seconds
- ❑ **Frictional Charging Limit** < .13nC psi
- ❑ **Bellcore Certified**
- ❑ **Exceeds Military Spec. #B-8-1705**

Certified Ratings

Fire Retardant

- ❑ American Nuclear Insurers (ANI)
- ❑ National Fire Protection Assoc. (NFPA)
- ❑ Scientific Ecology Group (SEG)
- ❑ Canvas Producers Assoc. Intl. (CPAI)
- ❑ Mine Safety & Health Admin. (MSHA)
- ❑ California State Fire Code
- ❑ Boston Fire Marshall's Code

DuraShield 8000ASFR makes a perfect material to create temporary enclosures for protection of static-sensitive equipment during unpacking, moving and storage. Static build-up that could ruin delicate circuits is conducted away from the equipment through the graphite lines which cover the entire tarp surface.

Ordering information and available options

RAIN DRAIN TARP

- *Finished sizes: 3.5' x 5' 10.5' x 25'*
5.5' x 10' 14.5' x 25'
7.5' x 15'
- *Custom sizes on request*
- *Available as part of the kit or by itself*
- *Triple-folded, double stitched, nylap reinforced hem; grommets at 3' centers*

DURASHIELD 8000ASFR

- *Stock rolls from 4' x 100' to 40' x 100'*
- *Custom sizes up to 30,000 sq. ft.*
- *Available with Velcro® closures, grommets drawstrings and pipe loops*
- *Comes in natural, yellow and green*
